Choosing and Using Credit Cards

Chances are you've gotten your share of "pre-approved" credit card offers in the mail, some with low introductory rates and other perks. Many of these solicitations urge you to accept "before the offer expires." Before you accept, shop around to get the best deal.

CREDIT CARD TERMS

A credit card is a form of borrowing that often involves charges.

Credit terms and conditions affect your overall cost. So it's wise to compare terms and fees **before** you agree to open a credit or charge card account. The following are some important terms to consider that generally must be disclosed in credit card applications or in solicitations that require no application. You also may want to ask about these terms when you're shopping for a card.

Annual Percentage Rate. The APR is a measure of the cost of credit, expressed as a yearly rate. It also must be disclosed before you become obligated on the account and on your account statements.

The card issuer also must disclose the "periodic rate" — the rate applied to your outstanding balance to figure the finance charge for each billing period.

Some credit card plans allow the issuer to change your APR when interest rates or other economic

indicators — called indexes — change. Because the rate change is linked to the index's performance, these plans are called "variable rate" programs. Rate changes raise or lower the finance charge on your account. If you're considering a variable rate card, the issuer must also provide various information that discloses to you:

- that the rate may change; and
- how the rate is determined — which index is used and what additional amount, the "margin," is added to determine your new rate.

At the latest, you also must receive information, before you become obligated on the account, about any limitations on how much and how often your rate may change.

Free Period. Also called a "grace period," a free period lets you avoid finance charges by paying your balance in full before the due date. Knowing whether a card gives you a free period is especially important if you plan to pay your account in full each month. Without a free period, the card issuer

may impose a finance charge from the date you use your card or from the date each transaction is posted to your account. If your card includes a free period, the issuer must mail your bill at least 14 days before the due date so you'll have enough time to pay.

Annual Fees. Most issuers charge annual membership or participation fees. They often range from \$25 to \$50, sometimes up to \$100; "gold" or "platinum" cards often charge up to \$75 and sometimes up to several hundred dollars.

Transaction Fees and Other Charges. A card may include other costs. Some issuers charge a fee if you use the card to get a cash advance, make a late payment, or exceed your credit limit. Some charge a monthly fee whether or not you use the card.

Balance Computation Method for the Finance Charge. If you don't have a free period, or if you expect to pay for purchases over time, it's important to know what method the issuer uses to calculate your finance charge. This can make a big difference in how much of a finance charge you'll pay — even if the APR and your buying patterns remain relatively constant. See page 4 for examples of how the methods can affect your costs.

Examples of balance computation methods include the following:

Average Daily Balance. This is the most common calculation method. It credits your account from the day payment is received by the issuer. To figure the balance due, the issuer totals the beginning balance

for each day in the billing period and subtracts any credits made to your account that day. While new purchases may or may not be added to the balance, depending on your plan, cash advances typically are included. The resulting daily balances are added for the billing cycle. The total is then divided by the number of days in the billing period to get the "average daily balance."

Adjusted Balance. This is usually the most advantageous method for card holders. Your balance is determined by subtracting payments or credits received during the current billing period from the balance at the end of the previous billing period. Purchases made during the billing period aren't included.

This method gives you until the end of the billing cycle to pay a portion of your balance to avoid the interest charges on that amount. Some creditors exclude prior, unpaid finance charges from the previous balance.

Previous Balance. This is the amount you owed at the end of the previous billing period. Payments, credits and new purchases during the current billing period are not included. Some creditors also exclude unpaid finance charges.

Two-cycle Balances. Issuers sometimes use various methods to calculate your balance that make use of your last two month's account activity. Read your agreement carefully to find out if your issuer uses this approach and, if so, what specific two-cycle method is used.

It's important to know what method the issuer uses to calculate your finance charge.

If you don't understand how your balance is calculated, ask your card issuer. An explanation must also appear on your billing statements.

OTHER COSTS AND FEATURES

Credit terms vary among issuers. When shopping for a card, think about how you plan to use it. If you expect to pay your bills in full each month, the annual fee and other charges may be more important than the periodic rate and the APR, if there is a grace period for purchases. However, if you use the cash advance feature, many cards do not permit a grace period for the amounts due — even if they have a grace period for purchases. So, it may still be wise to consider the APR and balance computation method. Also, if you plan to pay for purchases over time, the APR and the balance computation method are definitely major considerations.

You'll probably also want to consider if the credit limit is high enough, how widely the card is accepted, and the plan's services and features. For example, you may be interested in "affinity cards" — all-purpose credit cards sponsored by professional organizations, college alumni associations, and some members of the travel industry. An affinity card issuer often donates a portion of the annual fees or charges to the sponsoring organization or qualifies you for free travel or other bonuses.

Special Delinquency Rates. Some cards with low rates for on-time payments apply a very high APR if you are late a certain number of times in any specified time period. These rates sometimes exceed 20 percent. Information about delinquency rates should

be disclosed to you in credit card applications or in solicitations that do not require an application.

RECEIVING A CREDIT CARD

Federal law prohibits issuers from sending you a card you didn't ask for. However, an issuer **can** send you a renewal or substitute card without your request. Issuers also may send you an application or a solicitation, or ask you by phone if you want a card — and, if you say yes, they may send you one.

CARDHOLDER PROTECTIONS

Federal law protects your use of credit cards.

Prompt Credit for Payment.

An issuer must credit your account the day payment is received. The exceptions are if the payment is not made according to the creditor's requirements, or the delay in crediting your account won't result in a charge.

When shopping for a card, think about how you plan to use it.

To help avoid finance charges, follow the issuer's mailing instructions. Payments sent to the wrong address could delay crediting your account for up to five days. If you misplace your payment envelope, look for the payment address on your billing statement or call the issuer.

Refunds of Credit Balances. When you make a return or pay more than the total balance at present, you can keep the credit on your account or write your issuer for a refund — if it's more than a dollar. A refund must be issued within seven business days of receiving your request. If a credit stays on your account for more than six months, the issuer must make a good faith effort to send you a refund.

Errors on Your Bill. Issuers must follow rules for promptly correcting billing errors. You'll get a statement outlining these rules when you open an account and at least once a year. In fact, many issuers include a summary of these rights on your bills.

If you find a mistake on your bill, you can dispute the charge and withhold payment on that amount while the charge is being investigated. The error might be a charge for the wrong amount, for something you didn't accept, or for an item that wasn't delivered as agreed. Of course, you still have to pay any part of the bill that's not in dispute, including finance and other charges.

If you decide to dispute a charge:

- Write to the creditor at the address indicated on your statement for "billing inquiries." Include your name, address, account number, and a description of the error.
- Send your letter soon. It must reach the creditor within 60 days after the first bill containing the error was mailed to you.

The creditor must acknowledge your complaint in writing within 30 days of receipt, unless the problem has been resolved. At the latest, the dispute must be resolved within two billing cycles, but not more than 90 days.

Unauthorized Charges. If your card is used without your permission, you can be held responsible for up to \$50 per card.

If you report the loss **before the card is used**, you can't be held responsible for any unauthorized charges. If a thief uses your card before you report it missing, the most you'll owe for unauthorized charges is \$50.

To minimize your liability, report the loss as soon as possible. Some issuers have 24-hour toll-free telephone numbers to accept emergency information. It's a good idea to follow-up with a letter to the issuer — include your account number, the date you noticed your card missing, and the date you reported the loss.

Disputes about Merchandise or Services. You can dispute charges for unsatisfactory goods or services. To do so, you must:

- have made the purchase in your home state or within 100 miles of your current billing address. The charge must be for more than \$50. (These limitations don't apply if the seller also is the card issuer or if a special business relationship exists between the seller and the card issuer.) and,
- first make a good faith effort to resolve the dispute with the seller. No special procedures are required to do so.

If these conditions don't apply, you may want to consider filing an action in small claims court.

SHOPPING TIPS

Keep these tips in mind when looking for a credit or charge card.

- Shop around for the plan that best fits your needs.
- Make sure you understand a plan's terms before you accept the card.
- Hold on to receipts to reconcile charges when your bill arrives.
- Protect your cards and account numbers to prevent unauthorized use. Draw a line through blank spaces on charge slips so the amount can't be changed. Tear up carbons.
- Keep a record — in a safe place separate from your cards — of your account numbers, expiration dates and the phone numbers of each issuer to report a loss quickly.
- Carry only the cards you think you'll use.

FOR MORE INFORMATION

Questions about a particular issuer should be sent to the agency with jurisdiction.

The FTC works for the consumer to prevent fraudulent, deceptive, and unfair business practices in the marketplace and to provide information to help consumers spot, stop, and avoid them. To file a complaint or to get free information on consumer issues, visit ftc.gov or call toll-free, 1-877-FTC-HELP (1-877-382-4357); TTY: 1-866-653-4261. The FTC enters Internet, telemarketing, identity theft, and other fraud-related complaints into Consumer Sentinel, a secure, online database available to hundreds of civil and criminal law enforcement agencies in the U.S. and abroad.

Here's how some different methods of calculating finance charges affect the cost of credit:

	Average Daily Balance (including new purchases)	Average Daily Balance (excluding new purchases)
Monthly rate	1½%	1½%
APR	18%	18%
Previous Balance	\$400	\$400
New Purchases	\$50 on 18 th day	\$50 on 18 th day
Payments	\$300 on 15 th day (new balance=\$100)	\$300 on 15 th day (new balance=\$100)
Average Daily Balance	\$270*	\$250**
Finance Charge	\$4.05 (1½% x \$270)	\$3.75 (1½% x \$250)

* To figure average daily balance (**including** new purchases):
 $(\$400 \times 15 \text{ days}) + (\$100 \times 3 \text{ days}) + (\$150 \times 12 \text{ days}) \div 30 \text{ days} = \270

** To figure average daily balance (**excluding** new purchases):
 $(\$400 \times 15 \text{ days}) + (\$100 \times 15 \text{ days}) \div 30 \text{ days} = \250

	Adjusted Balance	Previous Balance
Monthly rate	1½%	1½%
APR	18%	18%
Previous Balance	\$400	\$400
Payments	\$300	\$300
Average Daily Balance	N/A	N/A
Finance Charge	\$1.50 (1½% x \$100)	\$6.00 (1½% x \$400)
